Crash Programs

Editorial Dealer--Sir...
The best writers and news
analysts, also Pearson, Lipp-
man and even Lawrence along
with the best of scientific
and military (Gen. Pow-
ell... yes even Dulles of
Central Intelligence knew of
our lag in the missile race.

There is only one way to
overcome the lead and pass the
Russians in this race but it
cannot be done with business
as usual as there are too many
noses in the trough.

Only a complete change in
our national thinking and our
method of laissezfaire will save
us from total annihilation if
and when they are ready and
will want to.

It calls for crash program on
education, production and our
way of life and a complete
change of our economic system.

In this race where technology
can be brought in to be the
dominate force for social
change and betterment, only a
contiguous continentalism can
compete with a contiguous
continentalism for the social,
economic, moral and yes the
military leadership of the world.
Nothing less will suffice.

HENRY G. STRANG
